Exam 000-061: IBM Dynamic Infrastructure Technical Support Leader

Question: 1

While working on a large data center consolidation, migration and business continuity project the outsourced Business Continuity (BC) site is destroyed by a natural disaster. While the project was near completion this situation completely sets back the BC portion of the project. The stakeholders have expressed the need to have both portions up before they will consider going live with the new data center. Without consideration for the financial aspects of the hardware loss or project deadlines what would be the first consideration before going forward?

- A. Ensure the stakeholders are aware of IBM guarantees for loss of the BC due to natural disasters.
- B. Review the contract with the BC site to see what the contracted site guarantees for the situation.
- C. Immediately identify a new location for the BC site that is adequately safe from disaster and make suggestions to move to this location including information
- D. Engage IBM IGS to host the BC site indefinitely until the insurance takes care of replacing the damaged hardware.

Answer: C

Question: 2

Business Partner Innovation Centers (BPIC) are setup to provide which of the following?

- A. IBM Business Partners with hardware and software solutions and services for customer demonstrations.
- B. IBM Business Partners with free training facilities on new hardware and software offerings
- C. Customers with hardware and software benchmark facilities
- D. Business Partners and customers with free demo hardware and software offerings

Answer: A

Question: 3

A POWER with AIX NEDC virtualization prospect is considering not using an HMC. Which IBM Virtualization Engine product is a graphical user interface which provides LPAR and virtualization support without an HMC?

- A. EWLM Control Center
- B. Virtualization Engine Console
- C. Integrated Virtualization Manager (IVM)
- D. Virtualization Planning Advisor

Answer: C

Question: 4

The cables for a large complex installation involving several vendors have arrived two days before the scheduled installation. Two of the cables are incorrect and must be reordered. Which of the following is the appropriate first action to take?

- A. Call IBM technical support for a technical workaround
- B. Discuss options and alternatives with the installation team
- C. Inform the customer of the delay to manage customer expectation
- D. Use an alternate vendor for overnight shipping

Answer: B

Question: 5

A large insurance company CIO is somewhat confused about energy efficiency claims from competitive vendors. Which of the following is an accurate statement concerning energy efficiency?

- A. Server consolidation and virtualization typically contribute to energy efficiency
- B. Rear Door Heat eXchanger is exclusively available for IBM BladeCenter
- C. Live Partition Mobility can reduce energy consumption by moving live AIX or Linux workloads from one Power5+ server to another, consolidate under utilized
- D. servers to reduce energy use
- E. Active Energy Manager manages all data center devices power use

Answer: A

Question: 6

A NEDC prospect is looking at Business Resilience for the planned System z server. They are considering using GDPS or a Parallel Sysplex. Which of the following is an additional major benefit of a GDPS over a Parallel Sysplex?

- A. Additional software aggregation benefits.
- B. Automation for application failover.
- C. Recovery Point Objective (RPO)
- D. Enhanced data sharing

Answer: B

Question: 7

A significant proportion of energy consumed by IT equipment is outside the data center in the office environment. Which of the following could a client use to reduce the energy use in the office?

- A. Conclusion of a Zodiac study
- B. Virtual Infrastructure Access (VIA)
- C. Conclusion of an Energy Efficiency study
- D. Virtual Client Solution

Answer: D

Question: 8

An ensemble manager is a key component of all ensembles. Which of the following systems management aspects is this key component responsible for performing?

- A. Serves as an extension of IBM Systems Director to manage multiple resources designed to be managed as a unit in an ecosystem.
